

Michael Frazier

Piedmont Municipal Power Agency

Director of Engineering and Power Supply

Michael Frazier currently serves as the Director of Engineering and Power Supply for the Piedmont Municipal Power Agency (PMPA). Mr. Frazier has been employed at PMPA for over 19 years. He began at PMPA as a Power Sales and Marketing Engineer selling surplus generation into the Southeast market. His current duties include managing the engineering relationships with PMPA's Participants, Duke Energy Carolinas, and other various energy companies and consultants. Mr. Frazier manages power-related engineering activities, programs, and functions for PMPA; wrote and maintains PMPA's procedures for the NERC reliability standards; and he represents PMPA and its Participants in various regional and national generation and transmission organizations. Prior to coming to PMPA, Mr. Frazier was the Finishing Manager at Mohawk Industries in Landrum, SC.

He received a Bachelor of Science Degree in Electrical Engineering from Clemson University in 1992.
